

# COVID-19 Rapid 15-Minute Testing Now Available

We've partnered with your local surgery team to support pre-operative COVID-19 testing. Here's how it works:

## 1 PROCEDURE SCHEDULED

Your local surgery center will let you know when your procedure has been set.

## 2 SCHEDULE YOUR TESTING APPOINTMENT

An ExpressCare caregiver will call to schedule a testing appointment for you within 24-72 hours of your procedure. Please answer the call from an 855 area code.

### At your testing appointment time:

## 3 GO TO YOUR TESTING SITE

Drive to your testing location at the scheduled time. Look for the sign that says "RESERVED." Please stay in your car, and follow the staff's instructions.

## 4 GET THE RESULT

Results are fast - 30 minutes or less. Your results will be shared with your doctor and surgery team and will inform the next steps for your care. You can choose to receive your results immediately, or if you have to go, you can review them later in MyChart.

## 5 SELF ISOLATE UNTIL TIME OF SURGERY

Follow best practices for quarantining until you arrive at the surgery center to minimize risk of infection between time of testing and your surgery.
